Ms Chay-Maree Walsh
New Enterprise Technologies

Dear Chay-Maree,

I just wanted to drop you a line and let you know how effective your website design has been for the StageDoor Dinner Theatre.

In the past 5 months nearly 2000 unique visitors have been through our site, with many transferring to bookings. All callers have complimented the site and its ease of navigation, the provision of every bit of information they need, and of course the pictures and graphic work in the site.

From my point of view it is so easy to maintain and keep up to date. The program you provided certainly allows computer illiterates such as me to be able to do 99% of the changes myself at my leisure. A fantastic bonus for us as a small business.

I cannot speak highly enough of your professional skill and care given with our on line project. You made it so easy for me to obtain an Internet presence for our business. The after sales service of NETECH is of the highest standard, the ability to monitor traffic through the site and relevant data is extremely valuable to us, and your continued support, encouragement and commitment to your customers success is a rare commodity in the business community.

We look forward to a long prosperous association with New Enterprise Technologies.

Once again thank you so much from all the staff and patrons of the StageDoor Dinner Theatre.
